

AIRFIELD & TERMINAL MODERNIZATION PROJECT

Project Overview

*LAX Guest Experience
Partners Council
June 3, 2019*

Project Elements

Airfield Improvements

- ✈ Relocate runway exits
- ✈ Extension and improvement of taxiways

Enhances safety, efficiency and helps reduce delays

Terminal Improvements

- ✈ Terminal 9 (T9) - 12 gate facility (12 new gates)
- ✈ Concourse 0 (C0) - 11 gate facility (9 new gates)
- ✈ All full-service international capabilities

Better guest experience (extra seating, check-in areas, security screening, charging stations, etc.)

Gates at T9 and C0 will replace West Remote Gates

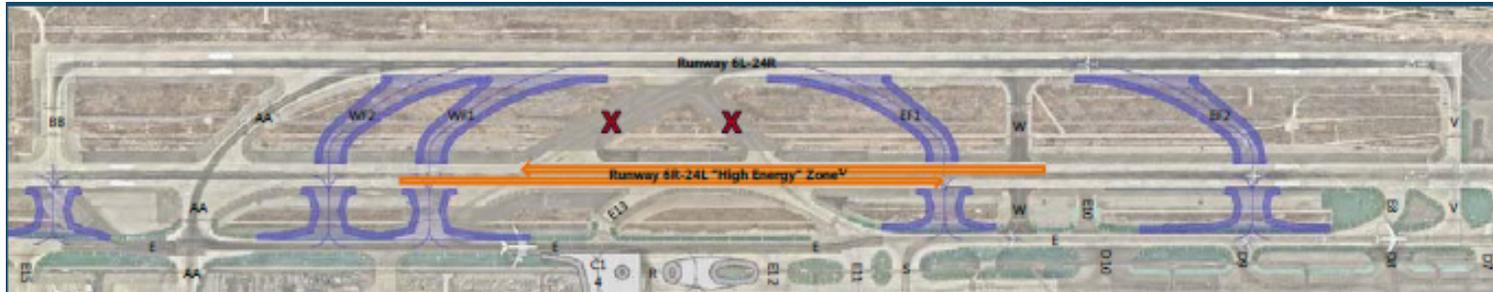

Landside Improvements

- ✈ Will serve Terminal 9
- ✈ Improve CTA access & reduce congestion on nearby public roads
- ✈ New APM station at Terminal 9 & pedestrian connector to Terminal 8

Airfield Improvements

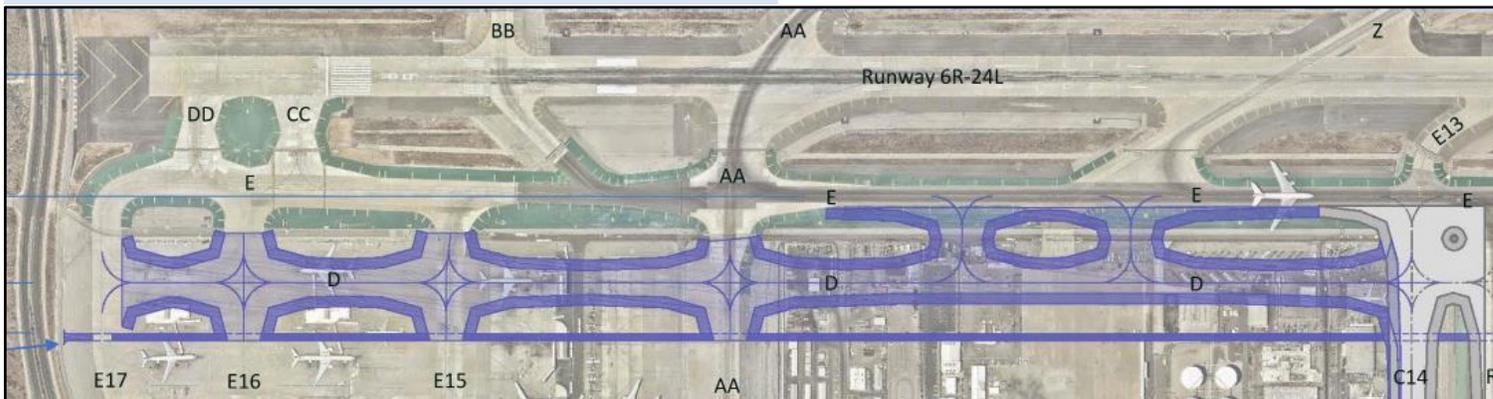

Airfield Improvements

Exit Taxiway Improvements

Taxiway Improvements – West End

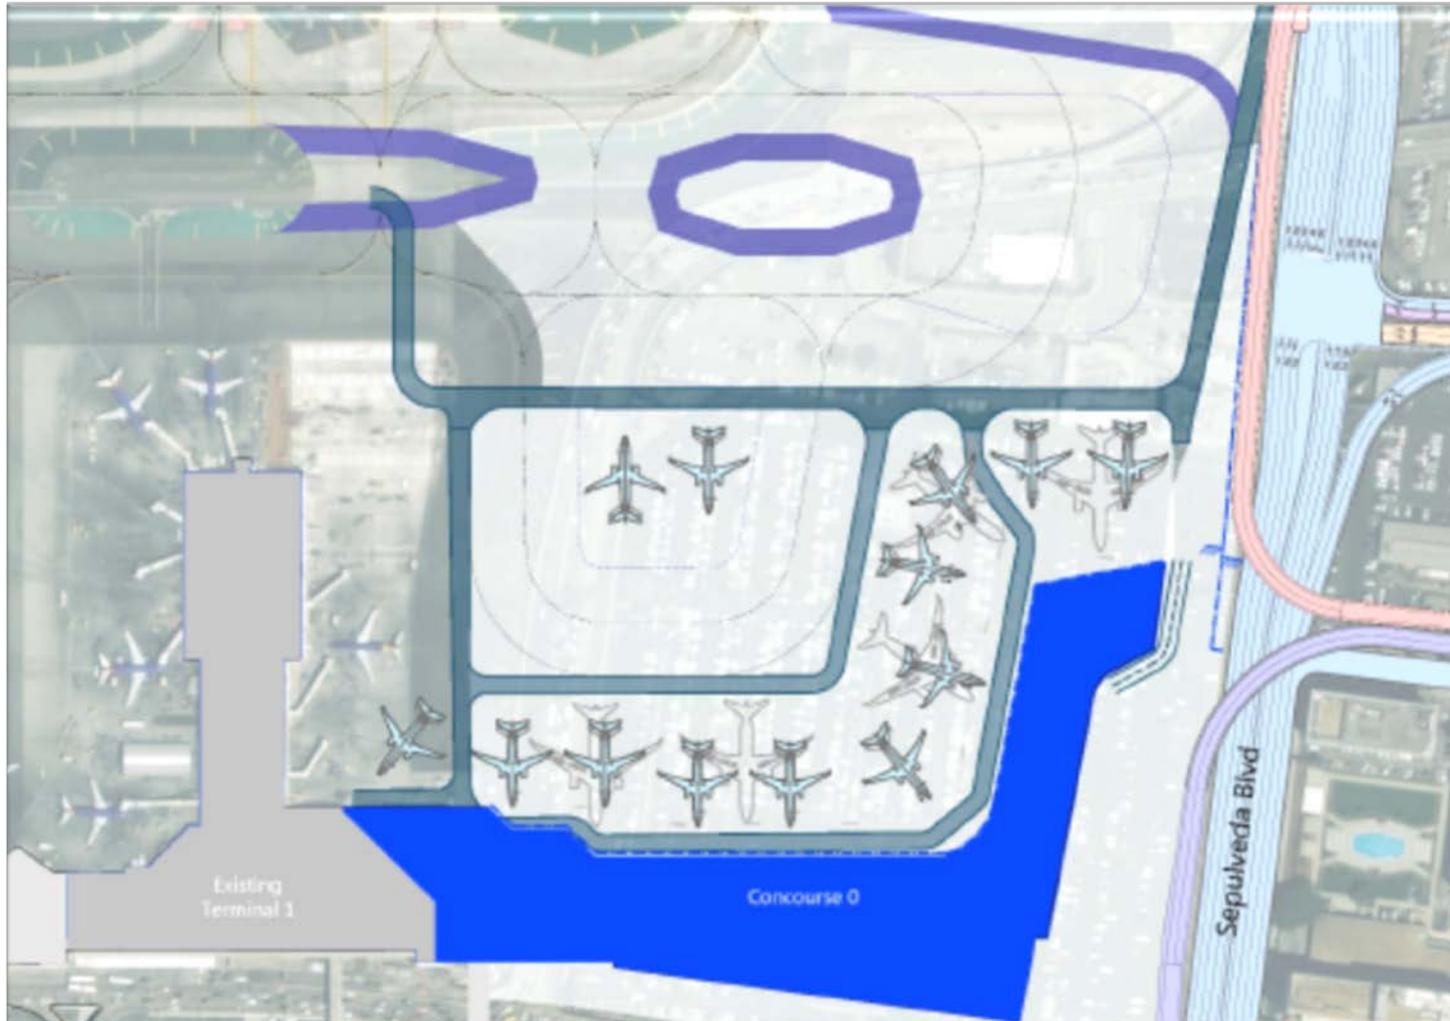

- ✈ Reconfiguration of taxiways/runways to meet current FAA design standards
- ✈ Improved runway exit configurations that enhance pilot visibility
- ✈ Decommissioning of taxiways that cross the runway “high-energy zone”
- ✈ Westerly extension of Taxiway D at ADG VI standards for operational efficiency and to meet FAA standards
- ✈ Improvements to Taxiways C & D for new Terminals
- ✈ Relocation of Vehicle Service Roads

Terminal Improvements

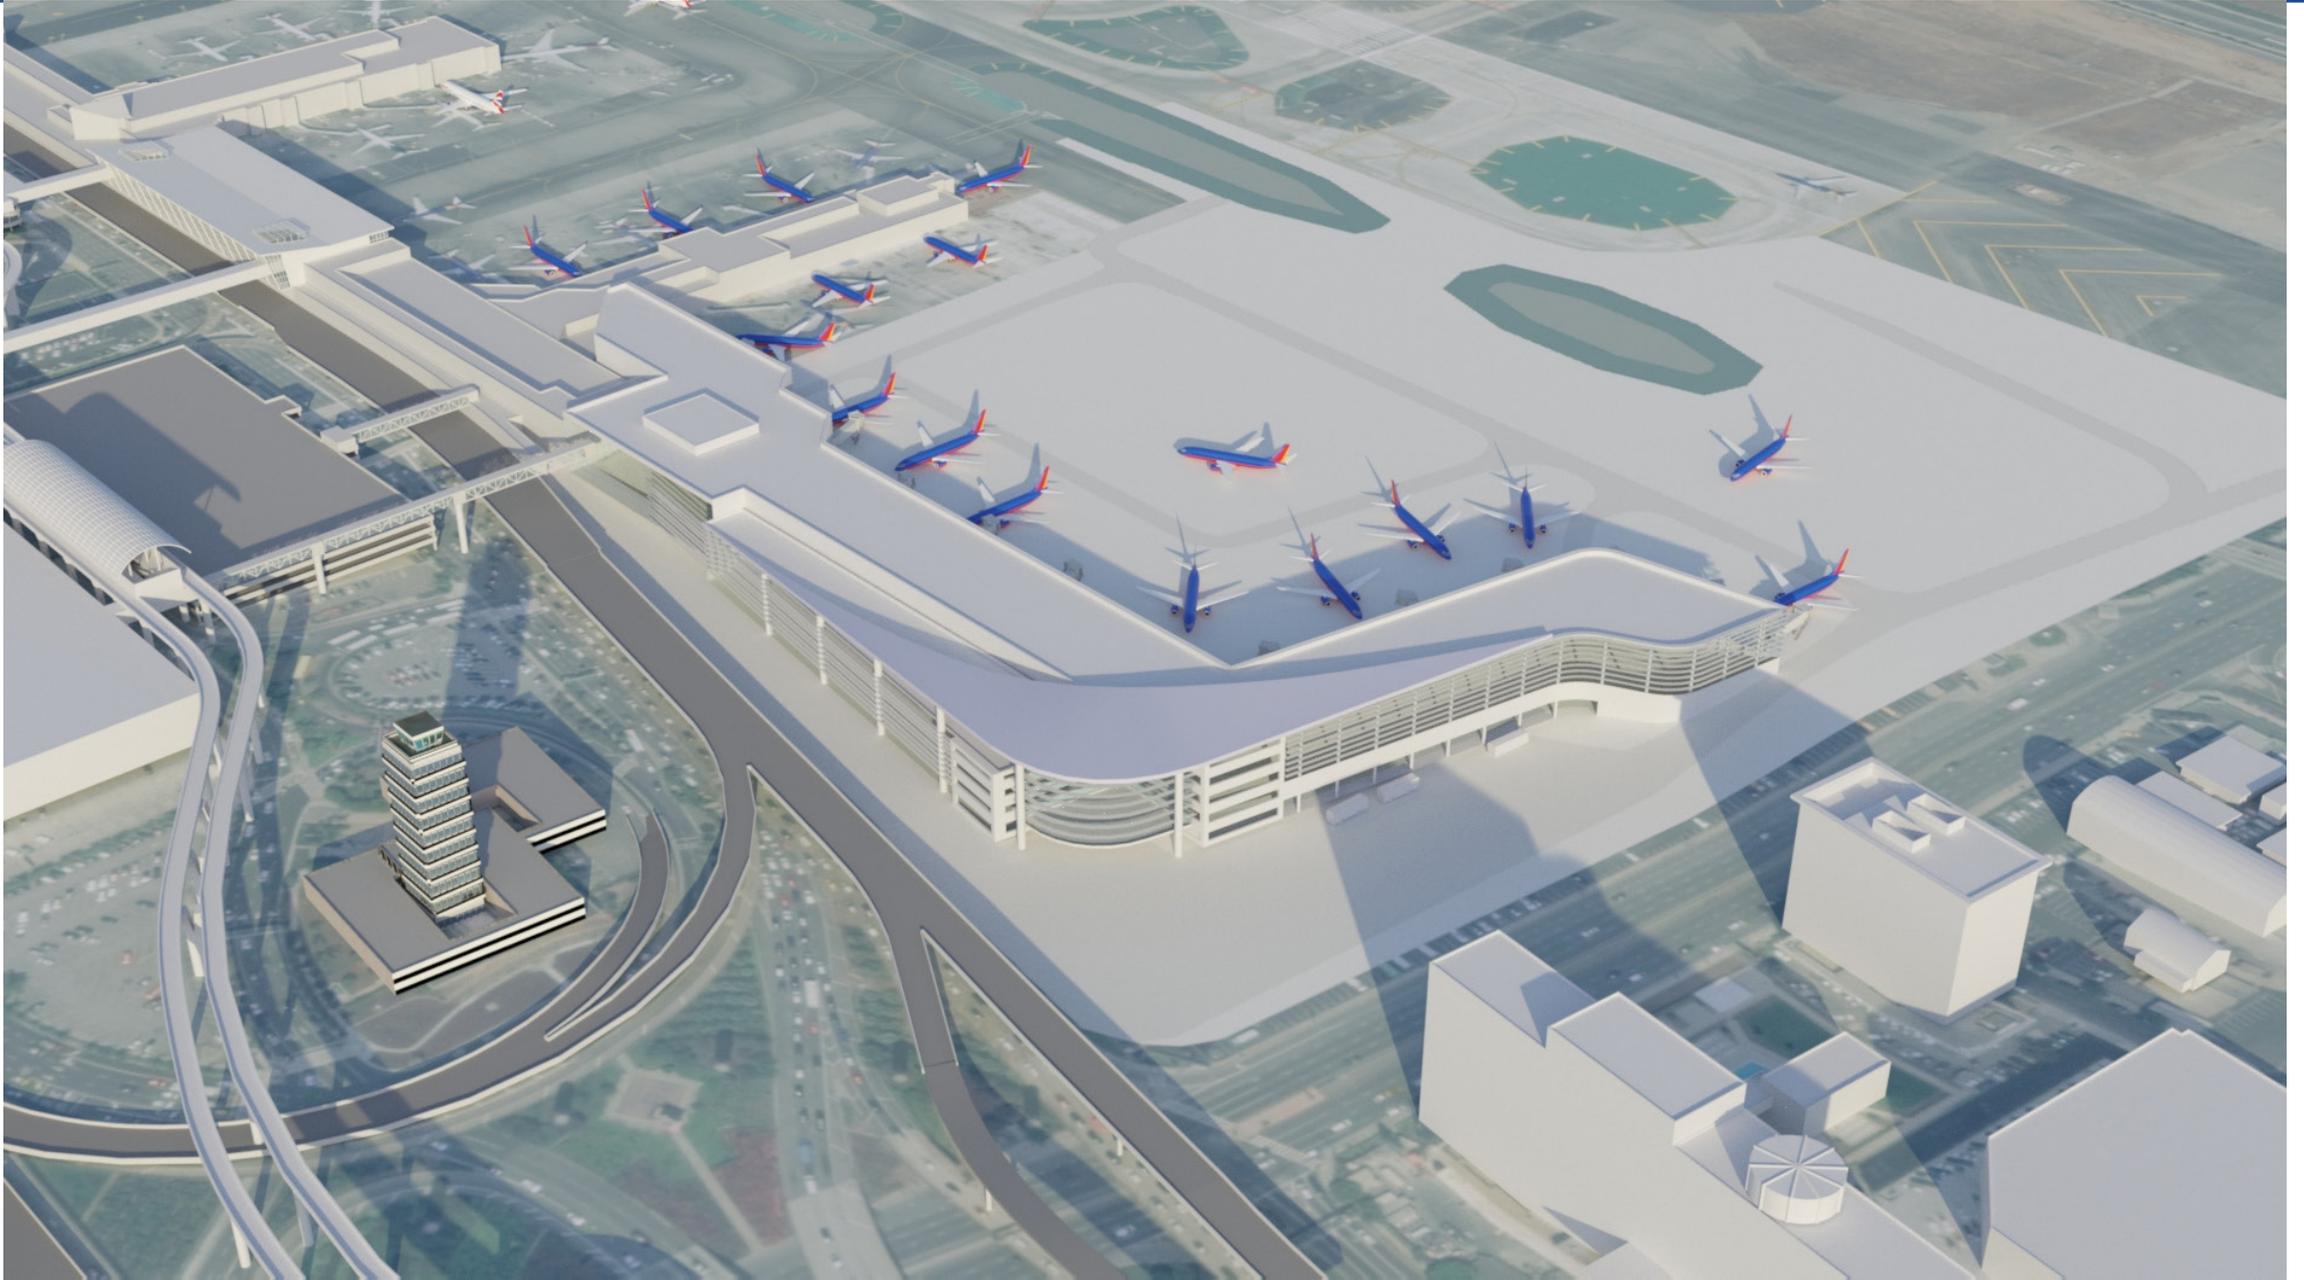

Concourse 0 Conceptual Site Plan

- ✈ 11 Gates (9 new) for narrowbody planes
- ✈ Accommodates up to 5 widebody planes
- ✈ 2 Remain-Overnight Aircraft parking positions
- ✈ Up to 1.2 million sf* (750,000 sf base)
- ✈ International (FIS) capability
- ✈ 4 levels (Ticketing, Concourse, Apron & Arrivals)
- ✈ Pedestrian corridor to new APM station
- ✈ No landside access – Passengers processed through Terminal 1

* With option for an Offices Levels and 20% design contingency

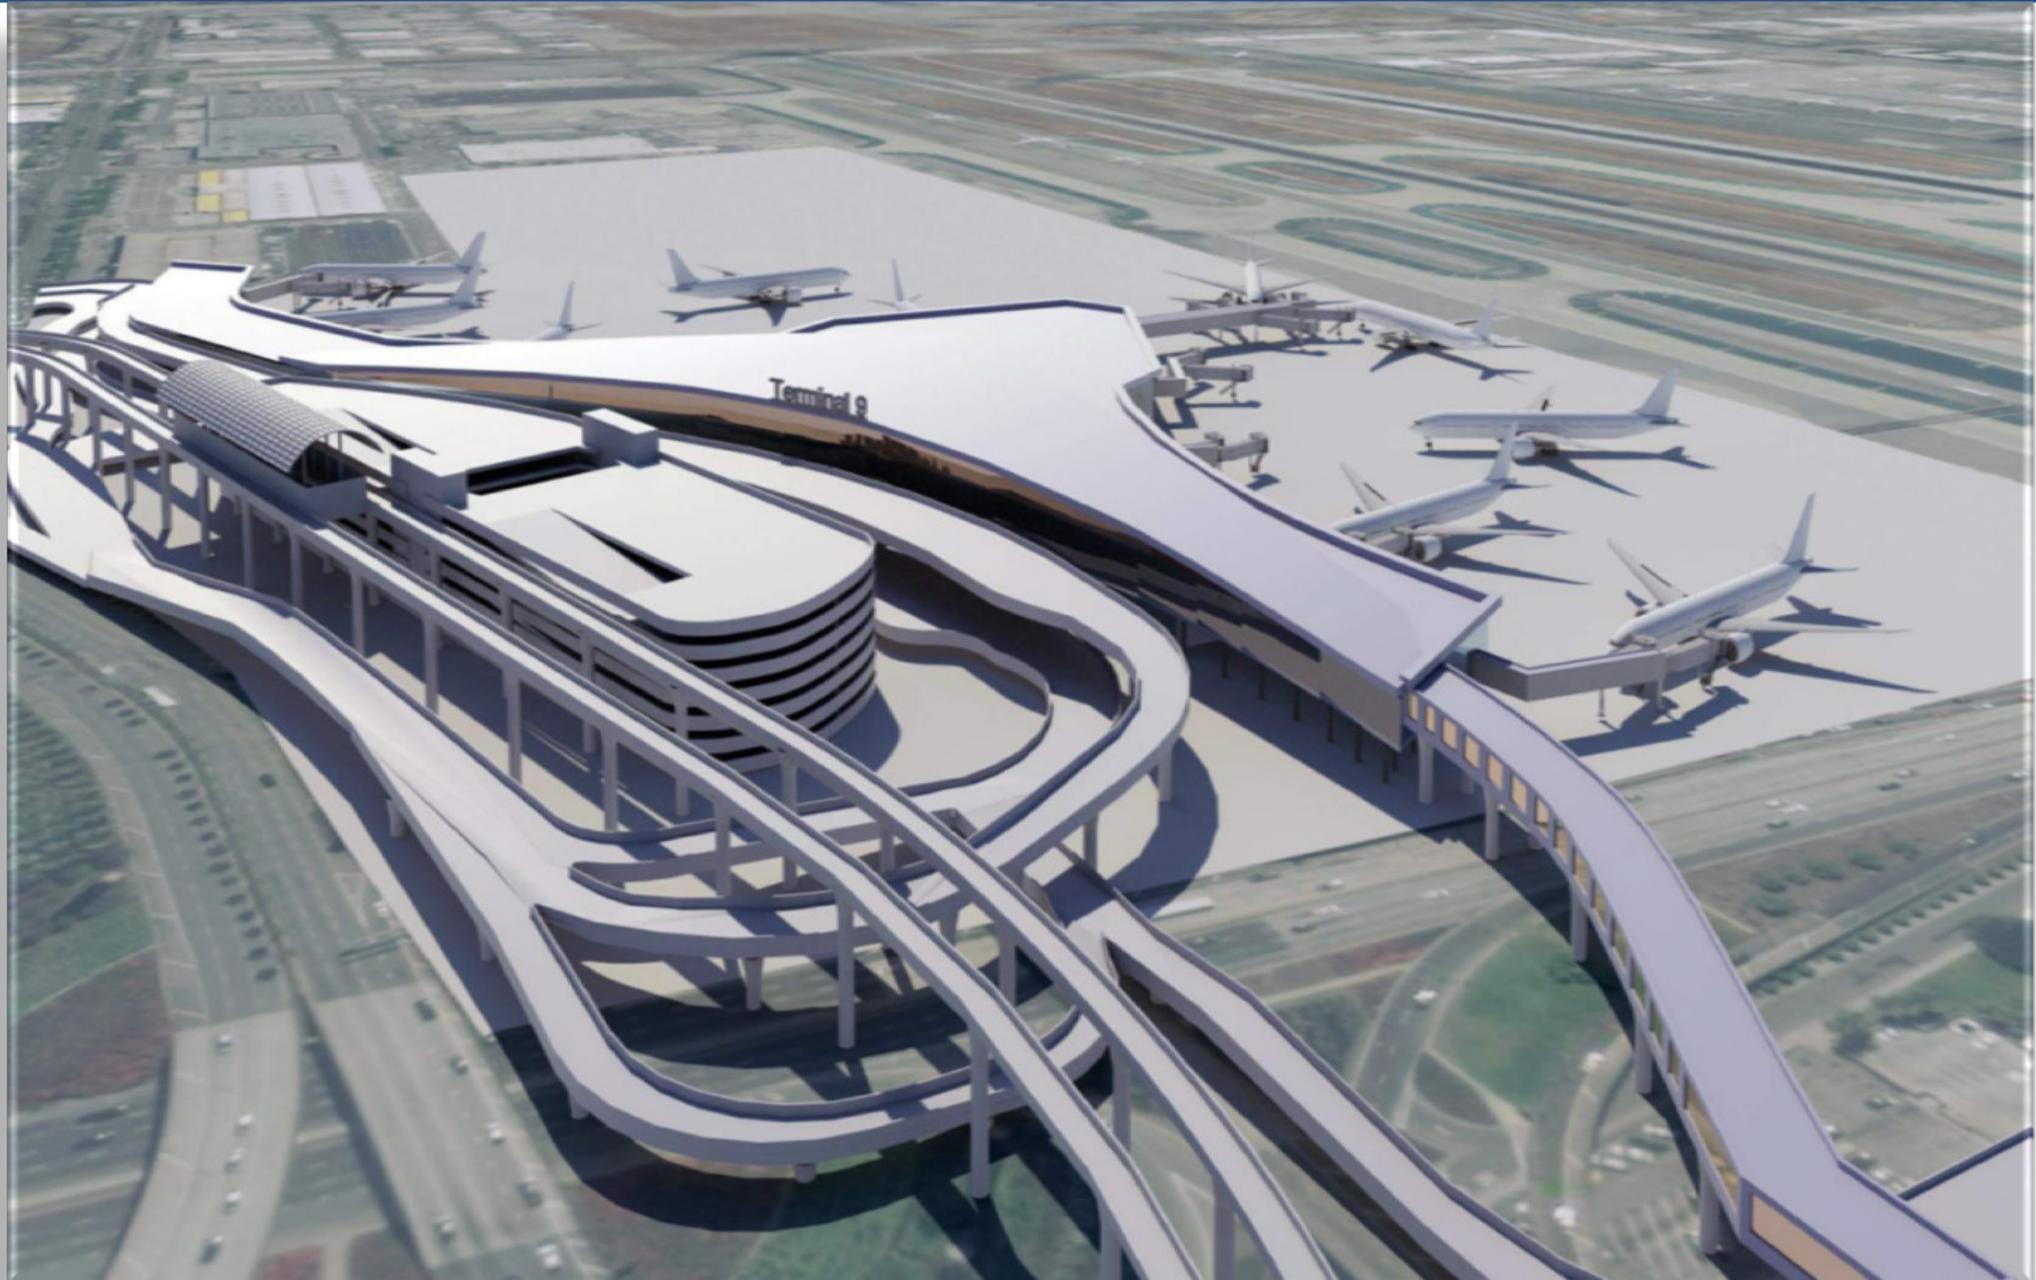

Terminal 9 Conceptual Site Plan

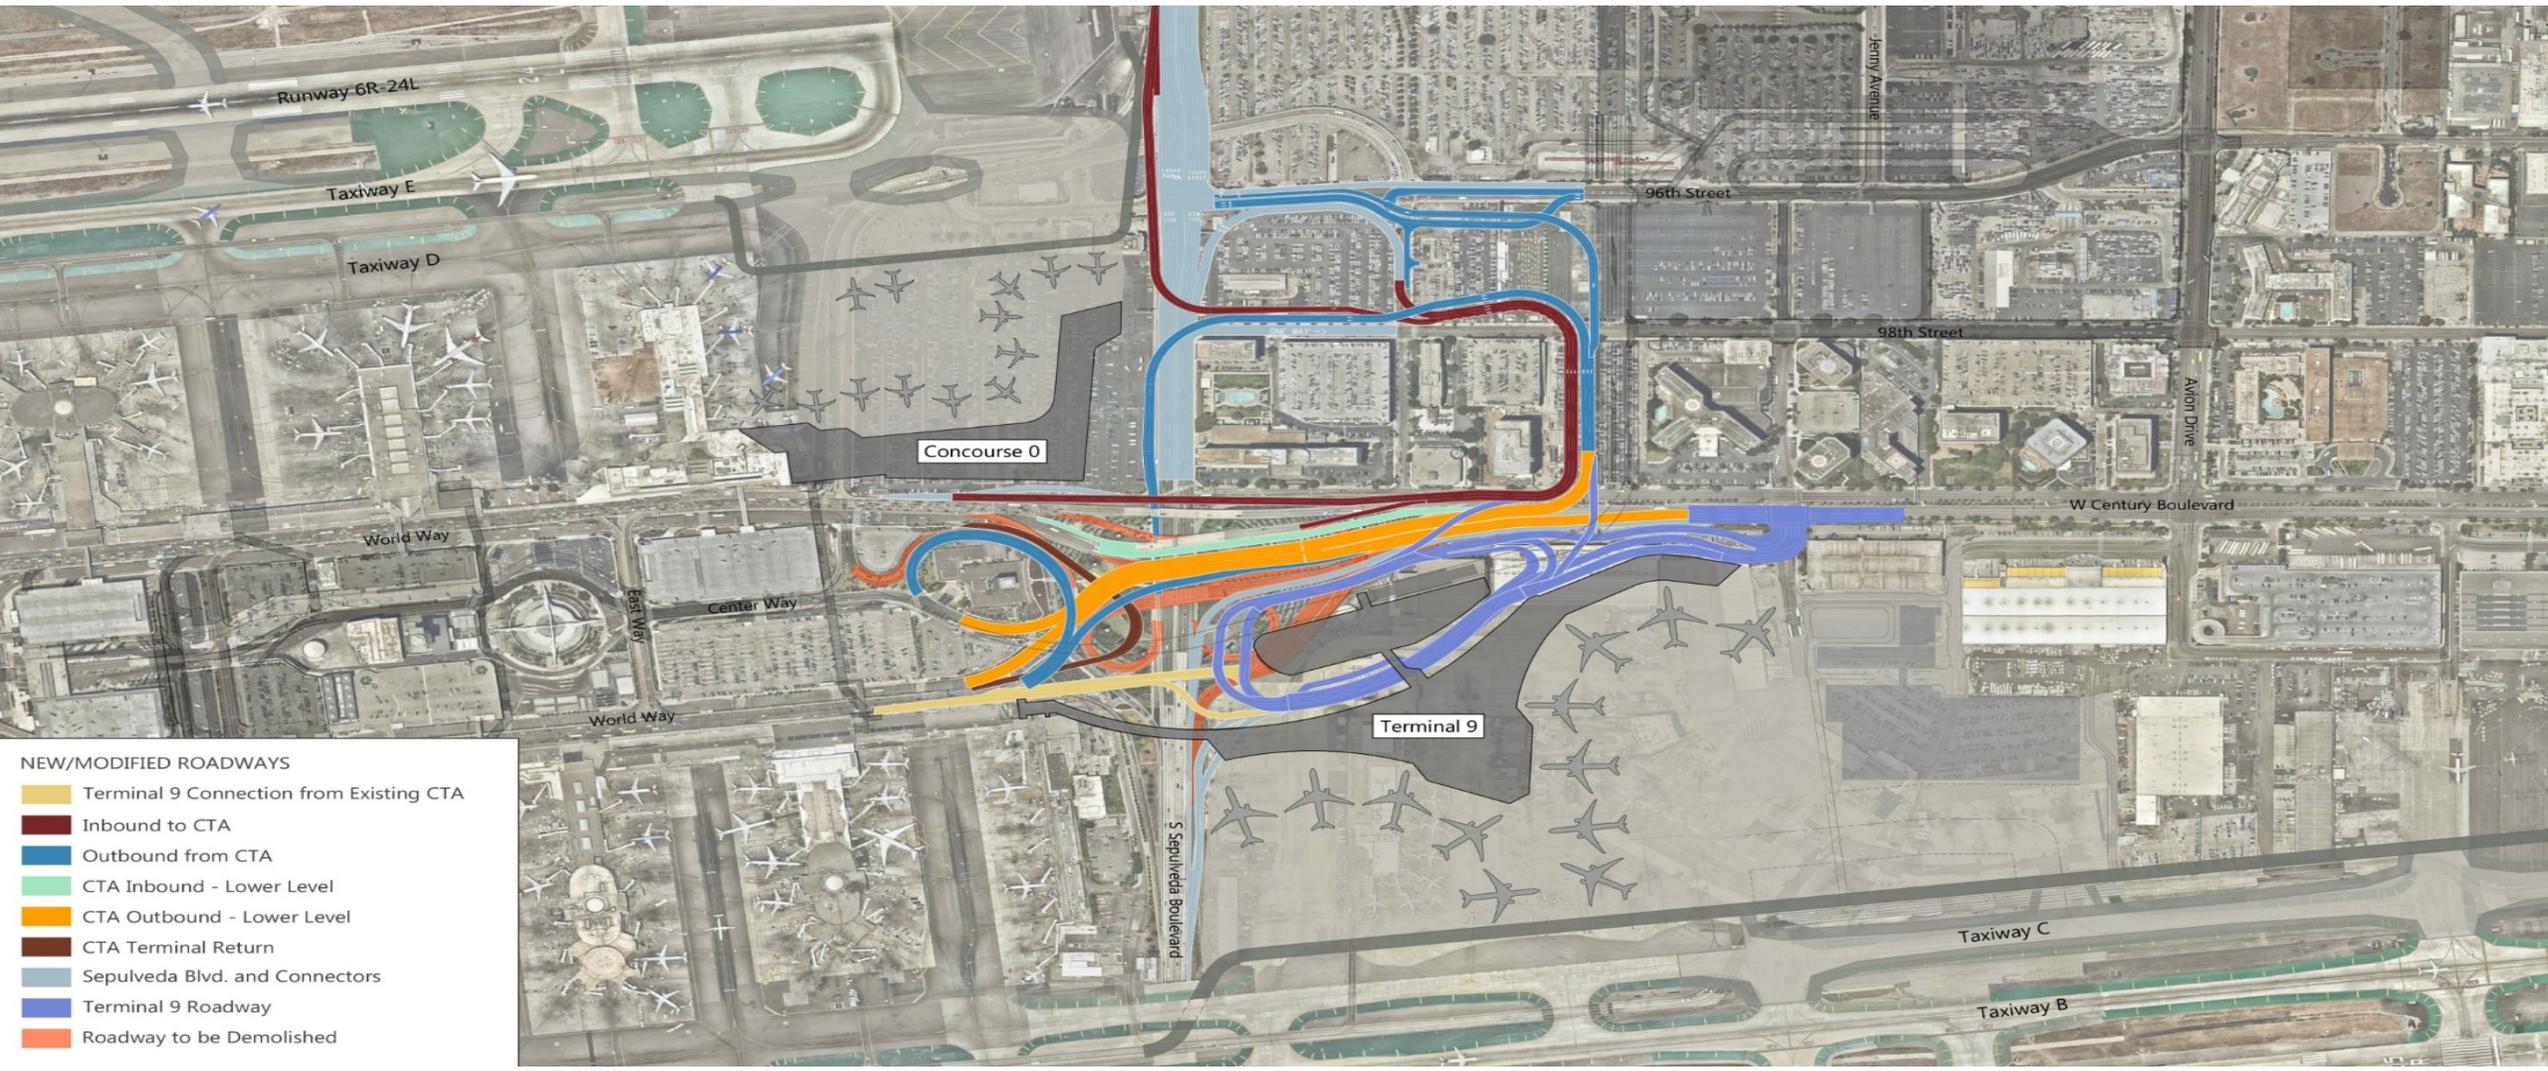

- ✈ 12 New Gates for widebody planes
- ✈ Up to 1.5 million sf* (1.2 million sf base)
- ✈ International (FIS) capability
- ✈ 4 levels (Ticketing, Concourse, Apron & Arrivals)
- ✈ Taxiway C improvement and easterly extension – ADG VI FAA design standards with 4-lane VSR
- ✈ Pedestrian corridor to new APM station
- ✈ Pedestrian corridor to Central Terminal Area (CTA) over Sepulveda
- ✈ Landside access to/from roadway system

* With pedestrian corridors and 20% design contingency

Landside Improvements

- NEW/MODIFIED ROADWAYS**
- Terminal 9 Connection from Existing CTA
 - Inbound to CTA
 - Outbound from CTA
 - CTA Inbound - Lower Level
 - CTA Outbound - Lower Level
 - CTA Terminal Return
 - Sepulveda Blvd. and Connectors
 - Terminal 9 Roadway
 - Roadway to be Demolished

Project Benefits

Benefits – Overall Project

Improves Passenger Experience

- ✓ Reduced wait times on tarmac
- ✓ Seamless transition between international & domestic flights
- ✓ Reduces on-ground travel by busing from remote gates
- ✓ Contact gates provide better passenger experience than busing from remote gates
- ✓ More seating, concessions & retail

Improves Community Experience

- ✓ Reduced traffic congestion on neighborhood streets
- ✓ Promotes sustainable practices - minimum LEED Silver certification
- ✓ Less aircraft idling reduces air pollutant emissions
- ✓ Connection to the APM & regional mass transit

Enhances Safety & Carrier Experience

- ✓ Increases safety & efficiency
- ✓ Reduced tarmac wait times
- ✓ Removes remote gates - less busing
- ✓ Improves taxiways
- ✓ Enhances aircraft movement

Increases Business Opportunities

- ✓ New Concessionaires (restaurants & shops)
- ✓ SBE & job opportunities during construction
- ✓ Local jobs & local business opportunities

Next Steps & Proposed Schedule
